

Getting Started with Your Free Alarm.com

MOBILE APP

Download the Alarm.com Mobile App to stay connected to your home 24/7, no matter where you are! The app lets you send remote commands and manage basic day-to-day functions across your system.

View and control your system from the palm of your hand with the easy to navigate **Dashboard**.

Arm and Disarm your panel, adjust Lights, Locks, Thermostats and Garage Doors.*

*These services are only available on certain plans. Please contact your security dealer for more information.

Click **Notifications** to add or manage your text and email notifications on-the-go.

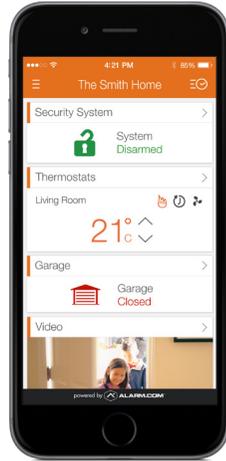

Go to the **Settings** menu to enable Push Notifications so you can know the minute something meaningful happens at home.

Enable automatic rules and alerts based on your phone's location through **Geo-Services**.

With Geo-Services you can automatically be alerted if you've left home without arming your system, pause video recordings for privacy, and have your thermostat adjust when you're approaching home.

Give yourself an extra layer of protection by creating a **Mobile App Passcode**.

TIP! If you lose your phone, you can safeguard access to your account. Simply disable Automatic Login through the Mobile Apps menu from your Online Account.

www.alarm.com

ONLINE ACCOUNT

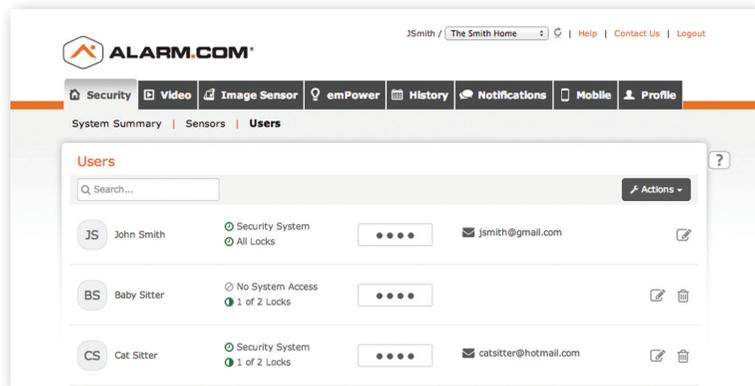

- 1 Log in to manage and view your system from the **Homepage**.

TIP! Click the Feature Usage bar to view a checklist of your available features.

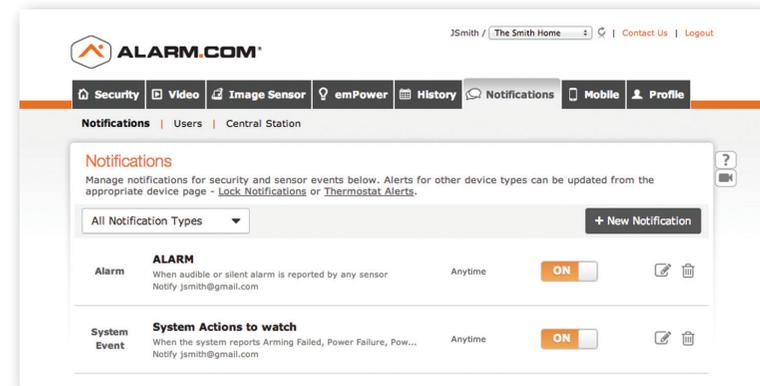

- 2 Set up **user codes** for your family members, friends, dog walker, nanny, or anyone who should be able to arm/disarm your panel.

Assign user-specific panel access, permanent or temporary, under the **Users** menu.

- 3 Set up **notifications** to receive alerts due to a system occurrence, such as the system reporting an alarm, if someone forgets to arm the system, or if a door is left open.

TIP! Adding and managing notifications can also be done from the Alarm.com Mobile App.

- 4 Create a "Geo-Fence" to enable location-based rules and alerts that automatically adjust your home's settings.

Geo-Services uses the location of your smartphone to detect when you're leaving or approaching your home.
